SimpleFit

*Mouthpiece & Ligature
for Bb Clarinet*

*The Howarth **SimpleFit** Mouthpiece & Ligature set is an innovative product developed to change the future of clarinet teaching for beginners.*

*It simplifies correctly positioning the reed on the mouthpiece and saves time in lessons. It is a one-piece unit to position a standard clarinet reed** in the optimum position from the tip of the mouthpiece and against the side rails, which is difficult for a young learner to achieve.*

The one-piece design also helps to guarantee that no parts can be lost.

The reed is held in position with a large screw, which needs only a slight turn to secure the reed. This is a much easier mechanism for young learners to operate than a traditional ligature. The screw on the

***SimpleFit** Mouthpiece and Ligature is engraved to show the correct direction to turn it for added simplicity. Made from synthetic material, the Simplefit Mouthpiece and Ligature has been constructed so that it is easy to clean thoroughly, helping to maintain good hygiene.*

A protective cap is included.

*The **SimpleFit** Mouthpiece and Ligature can increase the effectiveness of lessons and practice. The ease with which a young learner can attach the reed to their mouthpiece allows a more efficient use of lesson time without the teacher needing to check the reed is 'right' as is usual with a standard set up, especially in group teaching situations. This helps to motivate the learner and encourages them to practice at home allowing for accelerated progression and increased opportunities.*

*** The SimpleFit is designed to fit only Rico reeds at present. It will be possible to use certain other makes of reed in the future.*

• Will fit any Bb Clarinet or chalumeau/saxonet •

• All parts of mouthpiece and ligature secured, so can't be lost. (Cap is separate.) •

• Made from synthetic material for easy hygienic cleaning •
