

Clarinet mouthpieces

Bb german and austrian systems

The "D Concept"

A Boehm system mouthpiece specially adapted to the German clarinet and the "Reform Boehm", offered in two models: the M30D and B40D. The length and diameter of the shank, the bore, the appearance of the tip rail and the external shape are the components of this new concept, which offers a perfect balance between a very warm sound and great intonation.

56 rue Lepic reeds are more particularly recommended for these mouthpieces.

	CODE	COMMENTS
NEW M30D	CM36188	A good balance between timbre and roundness.
NEW B40D	CM36078	Produces a compact and centered sound.

VD Series: The German tradition

Available in 4 models: VD2, VD3, VD4 and VD5 with 2 different shank external diameters (W: 22,40 mm and S: 22,00 mm).

	CODE	CODE	COMMENTS
	(W)	(S)	
VD2	CM382	CM372	Provides a rich, centered and compact sound.
VD3	CM383	CM373	Very easy blowing in all registers, the standard reference.
VD4	CM384	CM374	This mouthpiece has the sound quality of the VD2 mouthpiece while being a bit more open.
NEW VD5	CM385	CM375	A compact, full and deep sound.

Austrian clarinet mouthpieces

	CODE	COMMENTS
VAO	CM390	A very closed mouthpiece.
VA5	CM395	Versatile and easy blowing, the standard reference.
